

# OKR PRACTITIONER COURSE

OKRINSTITUTE®

# Teams should focus on measuring Outcomes Not Outputs

## Why do teams tend to prefer outputs?

- Easier to control and predict
- Clear how to achieve
- Can be tracked in short-term easy

## Why should teams prefer outcomes?

- Enables value results comparison and data tracking
- Drives learnings of the team and organization as a whole
- Focus is clearer and narrower than outputs.

# Shift focus from Lagging to Leading indicators

---

## Lagging Indicators

- Definitive Results of the past
- Easy to spot
- Unresponsive and hard to change

## Leading Indicators

- Responsive to team actions
- Difficult to uncover
- Predictors of future success

# Shift focus from lagging to leading Key Results

---

Rely on metrics that respond to your **actions** as directly and quickly as possible instead of just relying on the results of the past.

# Leading vs Lagging Indicators

---

**Lagging Indicators** show you if you've achieved the goal. Difficult to change and slow to act on.

**Leading Indicators** tell you if you are likely to achieve the goal - meaning the team is doing the things most critical to goal achievement—something we can influence. More tactical changes that are easier to make in the present.

# Shift focus from Lagging to Leading Key Results

Assumed predictors of future success

Definitive results of the past

**Leading**

**Lagging**

Input

Output

Outcome

Impact

Number of hours spent on creating banners

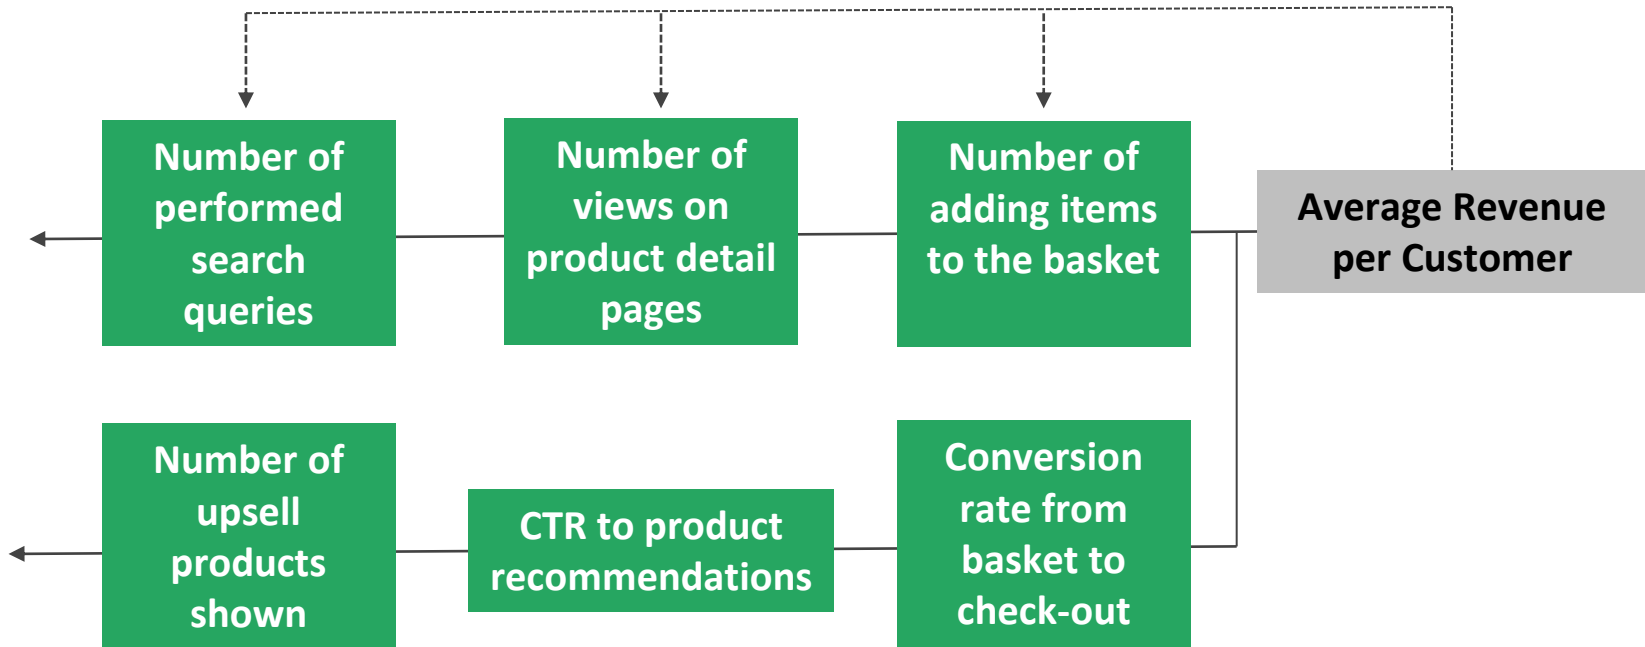

Number of banners promoting integrations

Number of actively used integrations per user

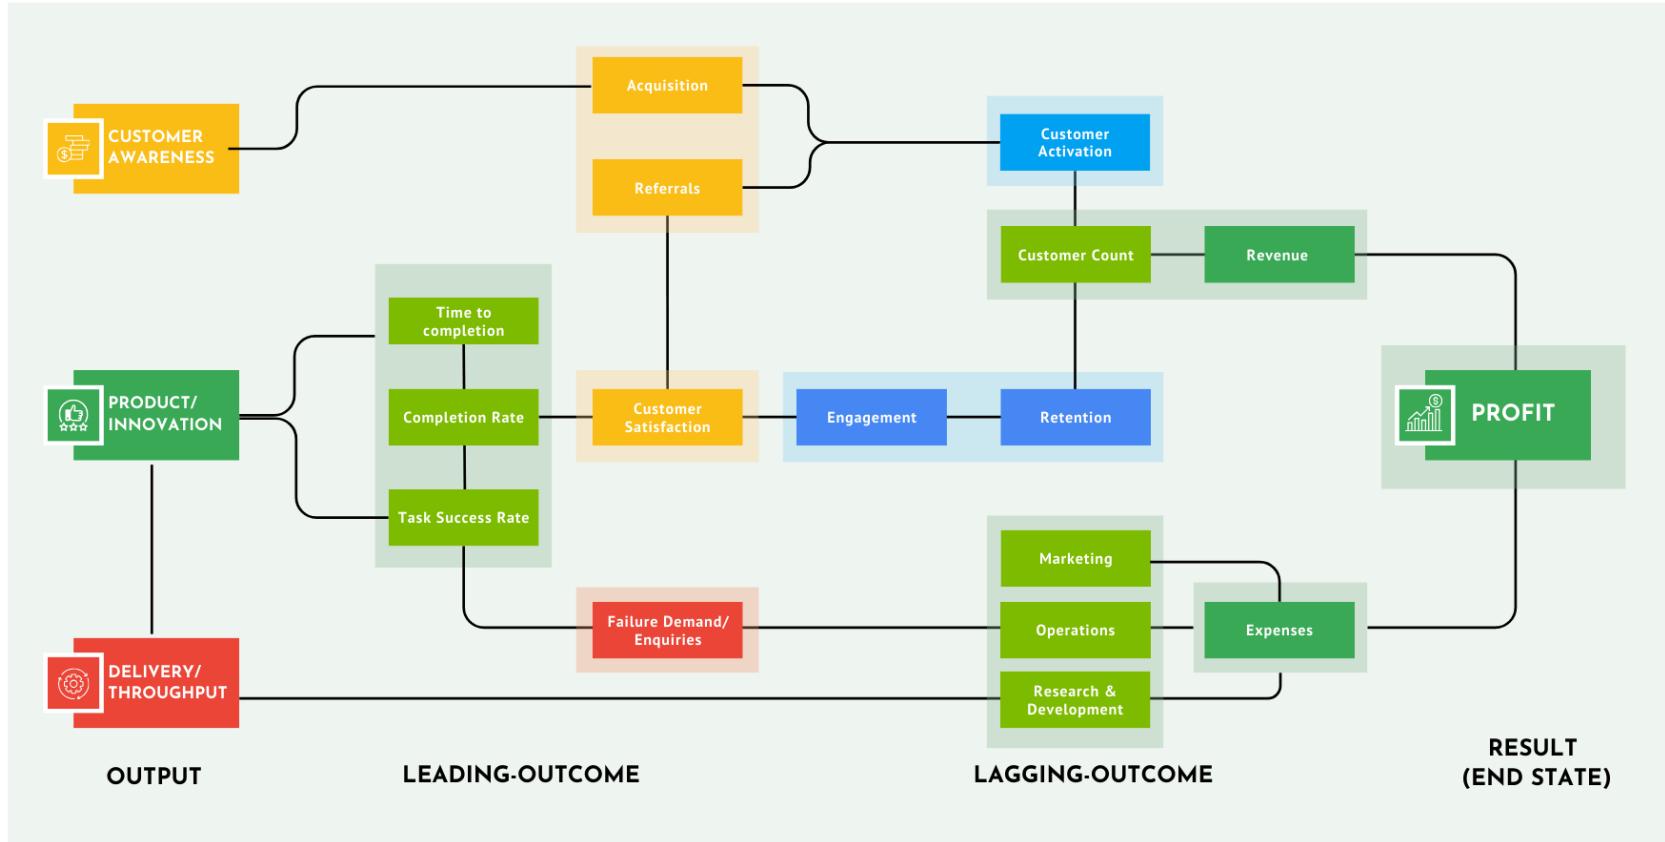

Total subscription revenue generated

# Shift focus from Lagging to Leading Key Results

Which behaviors? What actions? Get us closer to the KR and Objective?

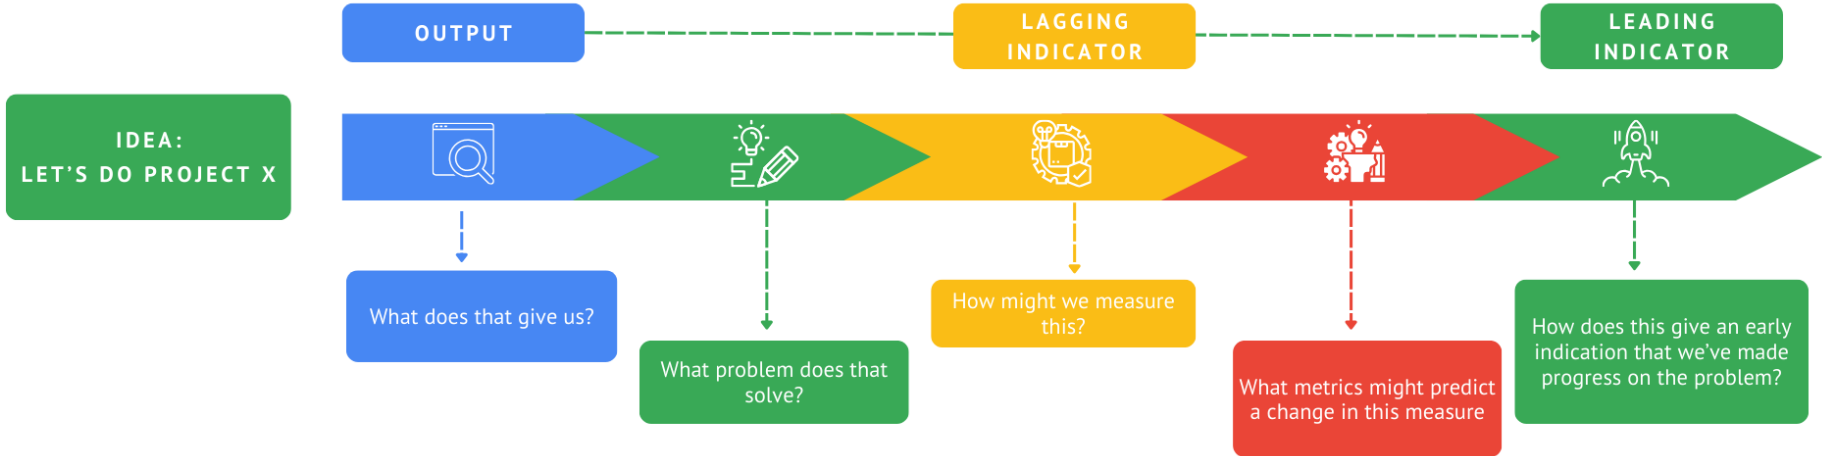

# Aligning OKRs with High Impact Metrics

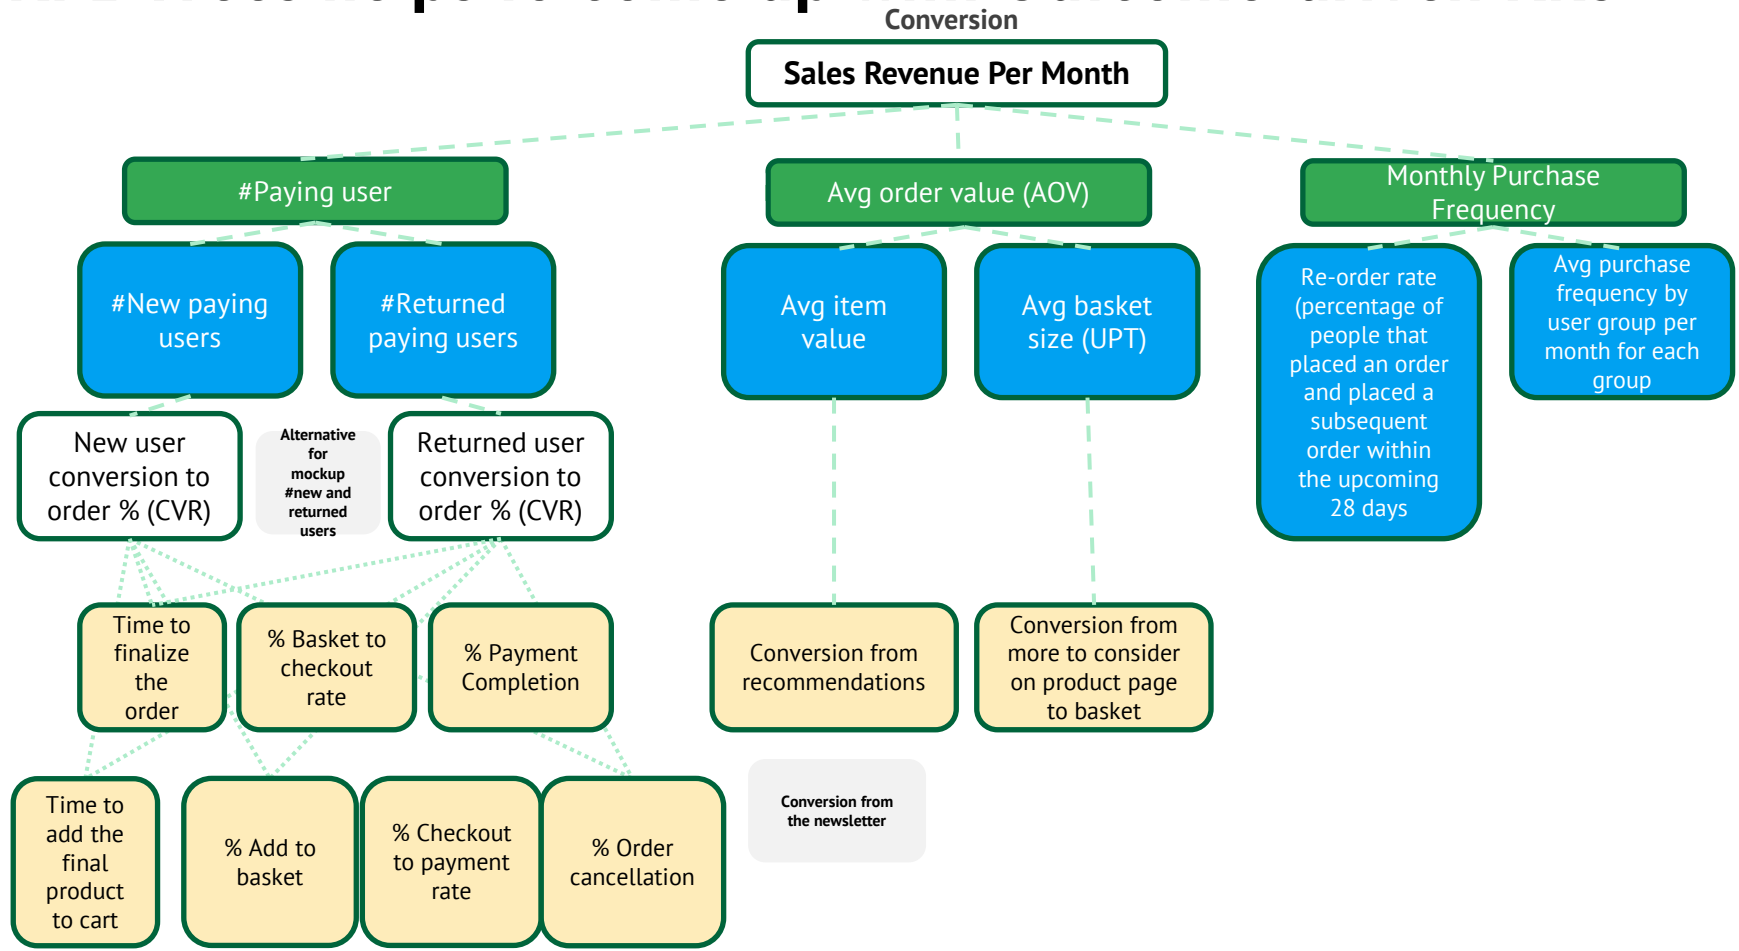

# Getting from Idea to Outcome

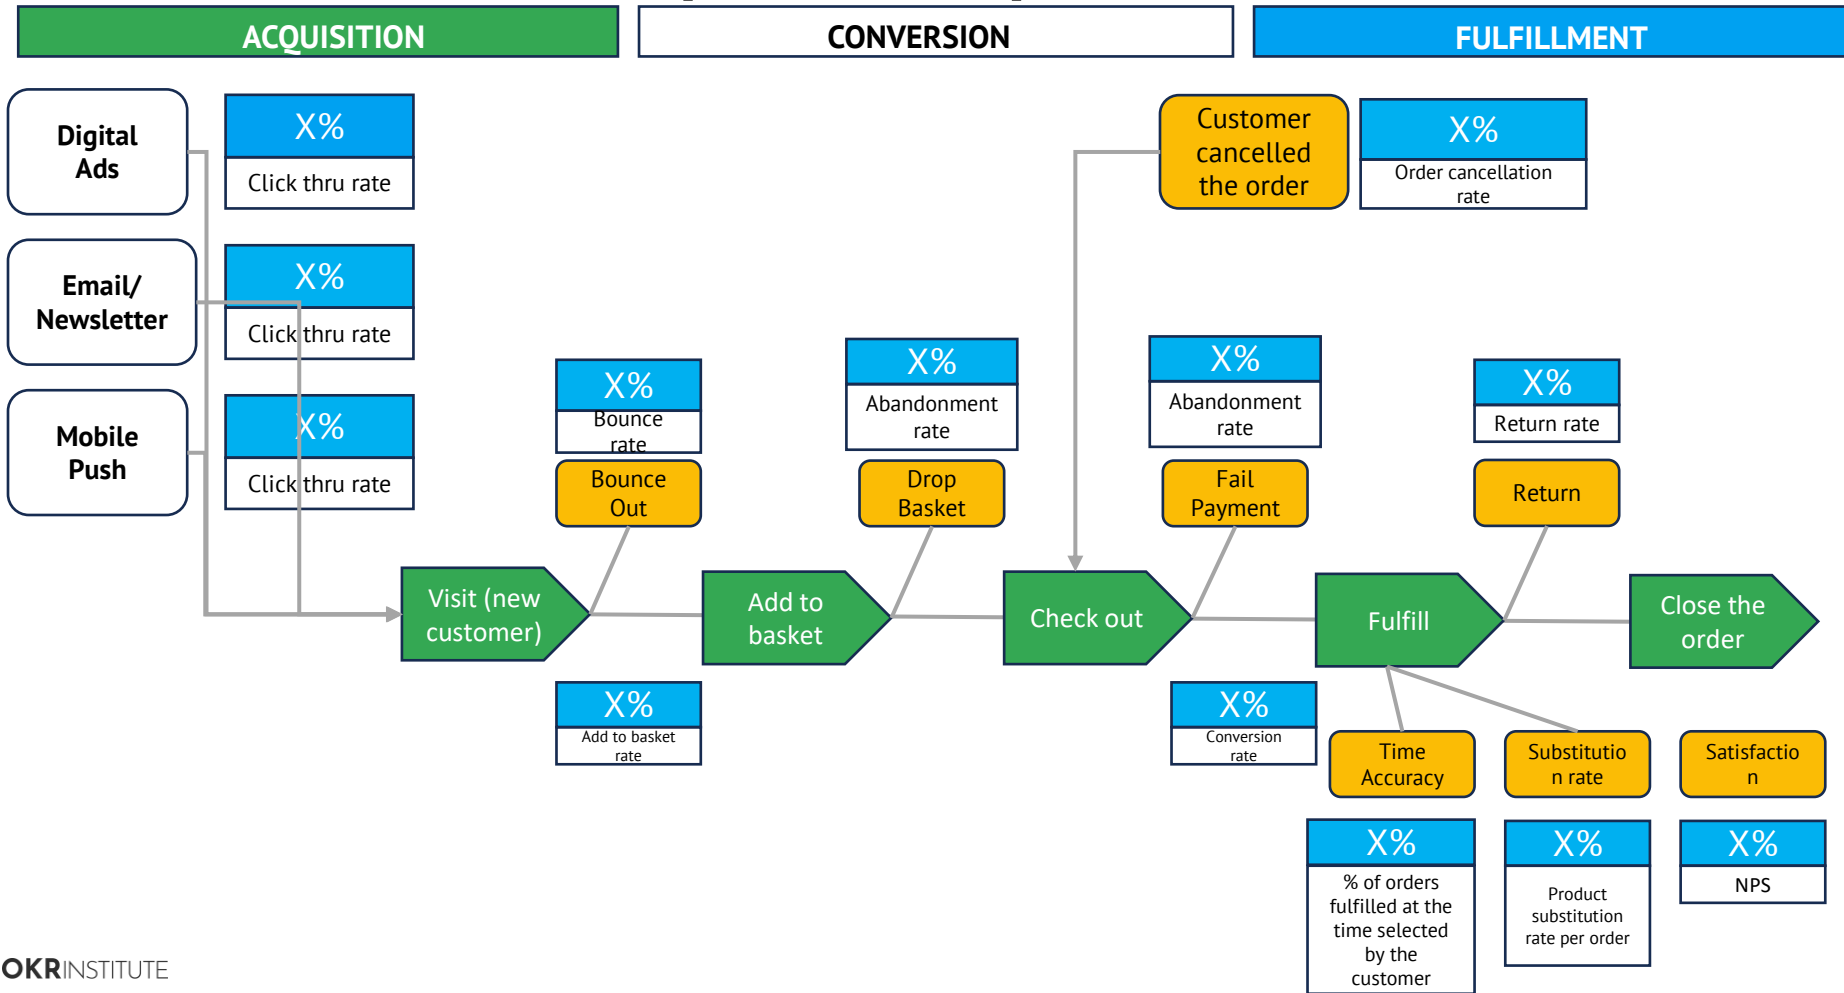

# KPI Trees helps to come up with Outcome-driven KRAs

LAGGING INDICATORS

LEADING INDICATORS

# Customer Journey to identify Bottlenecks and KRIs

# Based on Opportunities, the following OKRs were drafted

## Digital Ads Team

**Objective:** Achieve an increase in New User CRV by Implementing Highly Specific Audience Segmentation and Personalization

### Key results:

- Decrease the bounce rate of new users by a minimum of 10% by improving and personalizing the website content
- Achieve a CTR increase of at least 12% on personalized social media marketing campaigns targeted at new users.
- Improve the CSAT score for new users by a minimum of 15 points as a result of improved shopping experiences enabled by personalization and tailored content.

## Check Out Team

**Objective:** Enhance Product Discovery and Basket Addition to increase new users CVR

### Key results:

- Increase the click-through rate (CTR) from the product listings to the product detail page by 15%
- Achieve a minimum of 20% improvement in the "Add to Basket" button click-through rate (CTR) on the product detail page
- Implement A/B testing for the "Add to Basket" button to identify the most effective UX, with the goal of achieving a higher conversion rate compared to the current design

# Leading Indicator Statement

---

If we \_\_\_\_\_,  
*(do something)*

we should see \_\_\_\_\_,  
*(leading indicator)*

resulting in \_\_\_\_\_.  
*(lagging indicator / end result)*

# Leading Indicator Statement

---

If we improve the registration flow,  
*(do something)*

we should see an increased conversion rate of 20%,  
*(leading indicator)*

resulting in 10,000 additional users.  
*(lagging indicator / end result)*

# Shift focus from Lagging to Leading Key Results

---

## Lagging Indicator

Reduce 6 kg body weight

## Leading Indicator

Consume 20% less calories

Leading Indicators enable a team to work smarter by concentrating their energy on the actions that yield the greatest return.

# Shift focus from Lagging to Leading indicators

---

Leading or Lagging Indicator?

Win 500 new client via cold calls

Lagging

Leading or Lagging Indicator?

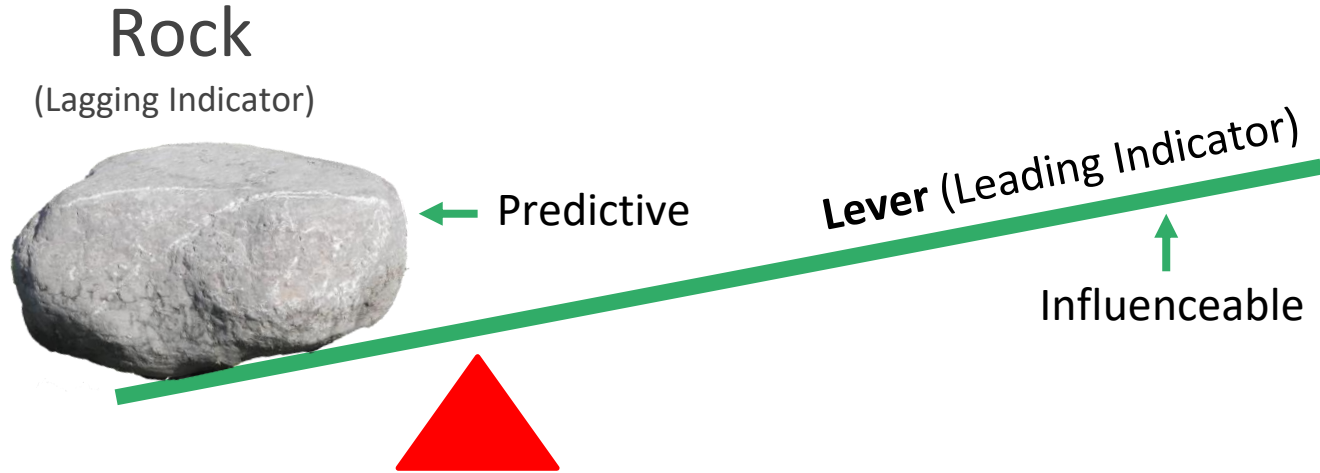

Call referrals with criteria A,B,C and generate 500 new clients

Leading + Lagging

# Finding the Leverage

---

# OKR

## Exercise (Homework)

---

### Key Results

**How** do I know I get closer to my destination?

### Examples

**Objective:** ? 2-3 Key Anchors – Outcome Driven

**Key Result:** ? min 1 Leading Key Result

**Key Result:** ?

**Key Result:** ?

# Objective Criteria

---

## Must Have:

- Directional
- Aligned
- Impact
- Outcome
- Key Anchors
- Why?
- Time Bound
- Not too many

Tells you where to go

Right direction (Strategies, Vision, Mission)

A substantial step towards that direction

Benefit & Impact for Stakeholder(s)

For Key Results

Answers the Why question

Due date

Less is more

## Nice to Have:

- Inspirational & Understandable

Using inspiring language – i.e. best, most robust, steepest

Simple and short language – allows one to connect with it

# Asking the Right Questions

---

## While setting Objectives

- Does this feel like it has a finish line?
- Is this feasible within our timeframe?
- Is there a more straightforward way to say this?
- Is this describing the problem to solve or the solution we'll try?

A magnifying glass with a black handle and frame is positioned over a dark surface. The lens of the magnifying glass is centered and contains the word "WHY?" in a bold, white, sans-serif font. The background is dark, and the magnifying glass is the primary focus.

**WHY?**

**Objectives define the Purpose**

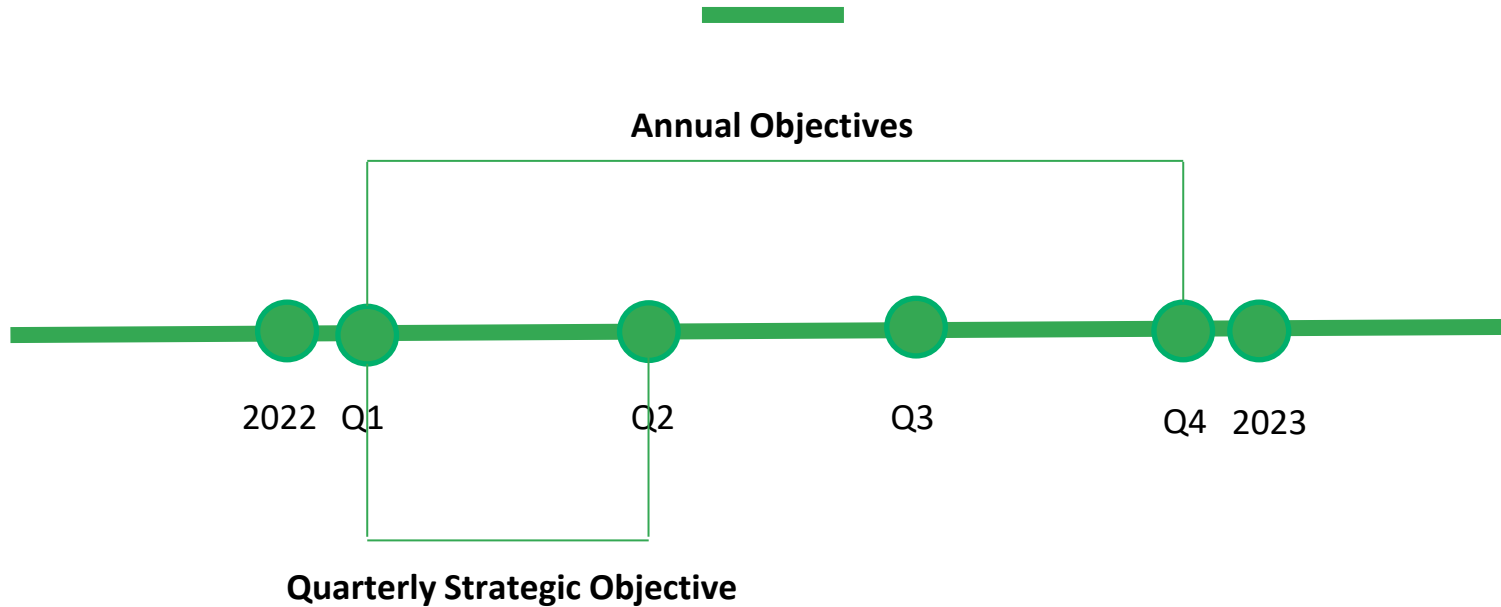

## Objective - Why Now?

---

**“Why now?”** should educate & motivate team members as well as clarify how the objective is aligned.

# Objectives

- Larger Organizations typically set annual Objectives
- While start ups prefer quarterly strategic Objectives

# Annual Objectives

---

**Annual objectives** are specific, measurable statements of what a business is expected to achieve yearly.

- Objective has a span of a year
- Key Results end in 90 days

Visualize it as a **marathon that is broken down into 90 days of sprints**

**Example:** Be the preferred Productivity & Performance Software for the Top Fortune 500 Companies

# Write Annual Objectives

- Choose a company (your own or an industry of your choice)
- Write 1-5 annual strategic objectives for the company
- Discuss in your group

# Strategic Objectives

---

**Strategic OKRs** are meant to help you carry out and focus on a company-wide goal that the company's executive-level managers usually set.

- Objective has a span of 90 days
- Key Results end in 90 days

Example: Crush the competitors in Bavaria for Productivity and Performance Software

# Write Strategic Objectives

- Choose a company (your own, or an industry of your choice)
- Write 1-5 annual strategic objectives for the company
- Discuss in your group

# Tactical Objectives

---

**Tactical OKRs**, on the other hand, help teams and departments carry out and focus on their own lower-level goals. Tactical goals tie into a bigger picture: the company-wide Strategic Objective.

Squad Teams Precision Operations that are High Impact Time Bound Missions

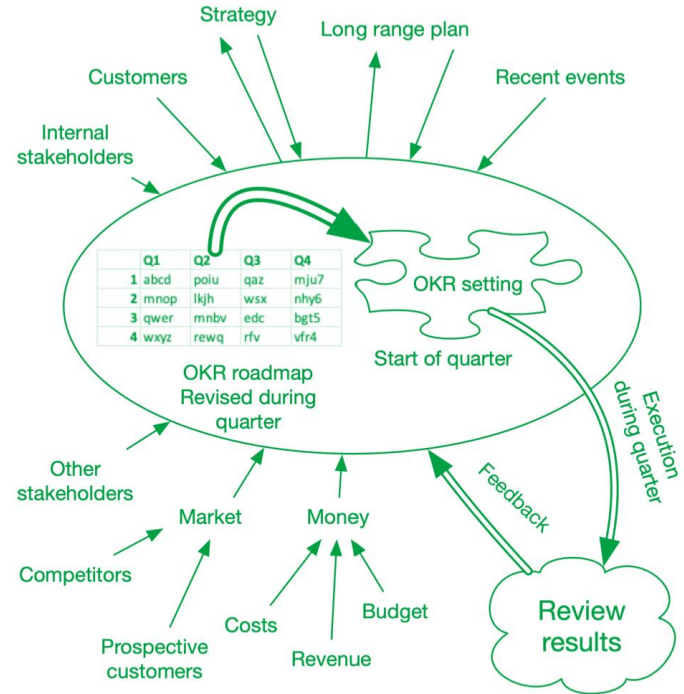

Example: Conquer the Munich payroll software market (for Regional Sale Team)

# Write Tactical OKRs

- At the tactical level, your company has three business units: Sales & Marketing, Support and Business Development
- Write 1-2 quarterly objectives for each of the business units that are linked to the strategic OKRs
- Write at least one key result for each objective
- Discuss in a group
- Are the tactical objectives relating to the key strategic results?
- Is it clear what it takes to have achieved the objective at the end of the quarter?
- Incorporate feedback to improve your tactical OKRs

# OKR Roadmap

- **OKR roadmaps** can help integrate multiple inputs to create hypotheses about **what the team will work on in future**.
- **OKR roadmaps are discussion documents** that pull multiple plans and opinions into a form that feeds into quarterly planning more easily.
- **List for Prioritizing**

# Make an Objective more Value Driven

---

**Objective:** Improve the website to facilitate a better experience for clients.

It might be better phrased as Accelerate the check-out process by improving the shopping cart.

Which could still be better stated as Increase UX by accelerating the check-out process.

The old user story technique of applying a “**so that**” to the end of an objective can help reduce the time it takes to complete the client check-out process. Becomes: Reduce the time for the check-out process so that customers have more time to shop and reduce the churn rate.

Although the problem with ‘so that’ is that it comes at the end. Therefore bring the benefit to the front: Increase UX and decrease churn rate by reducing the time for the check-out process.

# Key Results Criteria

## Must-Have:

- Make the Objective achievable
- Ambitious
- Measurable
- Leading

Tells you if you are getting closer

Uncomfortably excited

Has a number

What action is so impactful...

**If it is not achievable it's demotivating. If it's not ambitious it will be ignored**

# Asking the Right Questions

---

## While Setting Key Results

- Can we get the numbers weekly?
- Do you think these are possible in the timeframe?
- Is this metric fast-moving enough that we'll see it change in our timeframe?
- Is there a more straightforward way to say this?
- Could this metric be confused with a similar one? Do we need to be more specific?
- Is it possible to achieve the objective without hitting the key results?
- Is it possible to hit the key results and still not achieve the objective?

# Key Results should be quantifiable

---

Ask questions such as:

- How will this be measured?
- What is the unit of measurement?
- What is the current value?
- What is the target?

# Key Results as Experiments

---

Phrasing a key result as an experiment makes it safer for the team to take on risk. The development of an experiment is learning: the team has learned something, and learning has value.

**We believe <this capability>**

**Will result in <this outcome>**

**We will have the confidence to proceed when <we see a measurable signal>**

For example:

- Create and test 1 new feature to increase customer engagement by 5%
- Run 3 experiments to increase to 100 page views

# Real Outcome via OKRs

A simple check if your OKRs include words like:

- Consult
- Enable
- Analyze
- Participate

**Then you do not own outcomes**

# Outcome driven Key Results

Teams	Tasks	Average Key Results	Strong Key Results
<b>Logistics</b>	Daily dispatch before 4pm	<b>95%</b> deliveries acc. to SOP	<b>Reduce complaints</b> from 10 to 2 per day
<b>Marketing</b>	Revise website for new campaign	Collect <b>80%</b> of campaign data via website	Increase <b>conversion rate</b> of leads via website from 20 to 35%
<b>Sales</b>	Generate 100 leads	Generate <b>100</b> leads with criteria ABC	Generate 100 leads with criteria ABC leads to 60% <b>conversion rate</b>

# Write Strategic Key Results

- Write 1-2 key results to your annual strategic objectives
- Present to the group and receive feedback
- Are they measurable?
- If not – what could a measurable key result look like?

## Avoid Domino Key Results

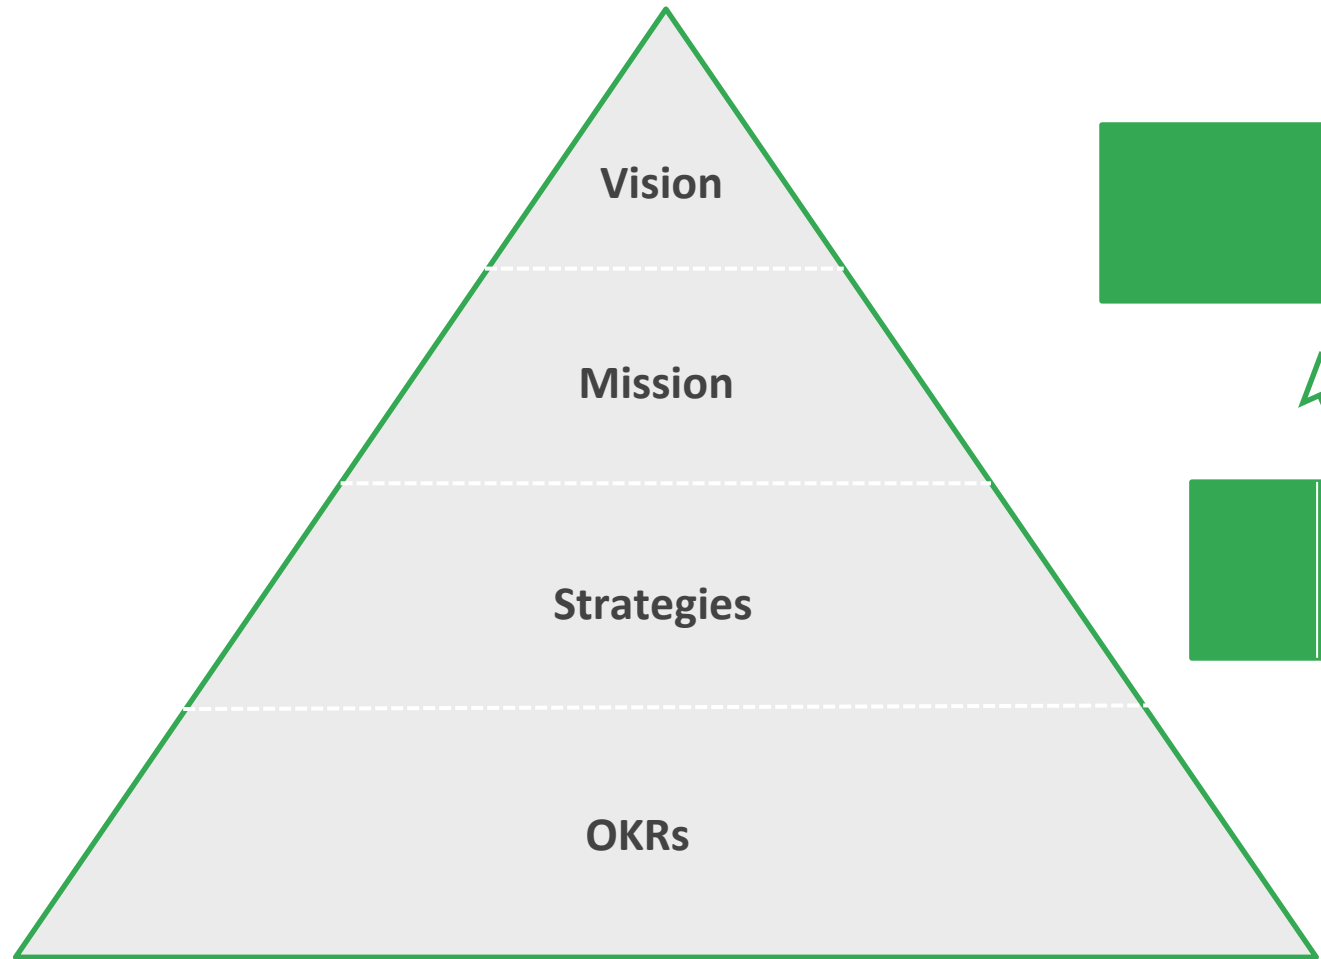

Like a domino run, if one falls, so does everything else. So fight against dominos. Don't accept dependencies until you have tried hard to eliminate them.

# Initiatives / Tasks Criteria (Action Plan)

---

## Must Have:

- Specific

Daily / Weekly actions

## Can:

- Milestones

Can be linked to KRs as Milestones

# Task/Project or Leading Key Result?

---

If you spot a task or project listed as a Key Result, ask a few questions:

- Why this task/project?
- Why is it important?
- What will it accomplish?
- What will change?
- How do you know if it's successful?
- What numbers will move if it works?
- How does that tie into the company's or team's Objective?

# Tasks or Leading Key Results?

# Action Plan

## Responsibilities

[Paste in the relevant Objectives and Key Results, you're responsible for]

[Objective]

1. [Key Result] [with team X]
2. [Key Result] [with team Y]

...

## Plan

[Organise this, however, makes the most sense in your context. This could be with headings for each KR, metric and areas you're responsible for, sequentially, by order of priority, or with a framework like big rocks, pebbles and BAU - or whatever else you find helpful. Add a short narrative where needed for clarity.]

# Action Plan

## Big Rocks

[The larger projects that will deliver the OKR]

1. **[Big Rock One]** - [description of main effort here in a sentence or two] [Note on Resources and / or timeline required for this]  
[Depends on software team A].
2. **[Big Rock Two]** - [description of main effort here in a sentence or two] [Note on Resources and / or time required for this]
3. **[Big Rock Three]** - [description of main effort here in a sentence or two] [Note on Resources and / or time required for this]
4. You probably don't want more than three big rocks for a quarter!

## Pebbles

[List of smaller projects that will get done around the Big Rocks to help deliver the OKR - put them in priority order]

- **[Pebble one]** - [bullet note]
- **[Pebble two]** - [bullet note]
- **[Pebble three]** - [bullet note]
- **[Pebble four]** - [bullet note]
- **[Pebble five]** - [bullet note]
- Etc.

## Plan example: BAU Processes

- **[Process one]** - [description of process or area you're responsible for] [Note on resources allocated to this]
- **[Process two]** - [description of process or area you're responsible for] [Note on resources allocated to this]

# Action Plan

## Non-Plan

[As for Plan, but list out the things you won't do that:

- Someone may otherwise expect you will do
- Are good ideas that you've traded off doing to do the things in your plan
- Are good ideas that you would do if you had some extra resources

## Resources

[If you have complex resourcing, ensure you summarise this in a table, including hiring / onboarding / ramp up time as needed if you haven't got all the people you need.]

## Risks

[List a few (three) key risks - no need for thoroughness, just the things you think require awareness.]

## Projections

[If appropriate, list out milestones, metrics and projections that will help you know if you're on track.]

# Action Plan – Example

**KR: Increase number of clients onboarded per day from 250 to 600.**

## Plan:

- Hire, onboard and train 3 more people by week 7, increasing operations team size from 5 to 8, and clients onboarded per day from 250 to 400. (estimated hiring effort - included in BAU)
- Increase clients onboarded per day per person from 50 to 75 by:
  - Improving the processing tool to reduce processing time by 10% (Software team A commitment, ETA Week 5 - Q4)
  - Improving our client self-service documentation to reduce support requests from 1.8 per client to 0.5 per client. We'll do this by addressing the top 7 support request types, covering 80% of support requests (internal commitment - estimate 0.5 person effort for 4 weeks)
  - Reviewing our workflow to identify breakpoints where onboarding gets stuck and addressing the best ones (internal commitment - estimate 0.5 person effort for 8 weeks)

# Action Plan – Example

## Non-Plan:

- We are not tiering our clients - same service for all
- No changes to onboarding requirements

## Resources:

- 5+3 operations headcount (approved - **Finance**),
- 0.5 senior client onboarding reduces capacity by 25/day

## Risks:

- Hiring has been challenging lately, and 3 people by week 7 is ambitious
- We may not be able to identify enough specific workflow improvements
- 0.5 person effort may be unpredictable and time may not be accurate

## Projection:

- Week 6: 330 per day (add processing tool)
- Week 10: 500 per day (add 3 staff)

# Convert a weak OKR into a strong one

## Before

**O:** Launch a new website

KR 1: Design new website

KR 2: Find a developer

KR 3: Release new website

## After

**O:** Launch a **higher-converting** website that attracts more **quality leads**

KR 1: Improve visitor-to-lead conversion rate from 4 to 5%

KR 2: Find 2 developers with UI skills ABC (i.e. ENABLER)

KR 3: Test 1 feature per week, which leads to min X leads with X ABC criteria

**O:** Why do we want to build this website?

Launch a website to enable increase of online sales

# Convert a weak OKR into a strong one

## Before

**O:** New self-serve help area on website

KR 1: Better search function

KR 2: New FAQ page

KR 3: Forum page

## After

**O:** Our company **helps our customers online** to succeed **when they need help**

KR 1: Conduct 1 A/B testing per week for 2 search functions with outcome X

KR 2: Increase DAU on FAQ side from 2000 to 3000

KR 3: Decrease DAU on the help forum from 10 to 2K

O: Why do we want a new help area?

# Convert a weak OKR into a strong one

**Before**

**O: Launch a new product**

KR 1: Hire Product Manager

KR 2: Conduct a Survey

KR 3: Release new product

**After**

**O:**

KR 1:

KR 2:

KR 3:

O: Why do we pursue this objective?

# How to make a stronger OKR

---

This objective fails the “Why?” test

**Objective:** Make virtual training available for all courses.

**Objective:** Enable people to learn from **wherever they are, whenever they need.**

This objective fails the “Why?” test

**Objective:** We want to deliver features to our clients faster.

**Objective:** We want to deliver features our **customers love faster** and more **reliably.**

# How to make a stronger OKR

---

**Objective: Better customer experience**

**Key Result (Intent):** Make our clients feel good when they do business with us.

**Key Result (Intent):** Motivate employees to enhance customer service.

**Objective: Provide a level of customer service no other big company can.**

**Key Result:** Compile a report identifying problems in our current customer service processes. (KR Milestones)

**Key Result:** Cut our response time for customer complaints and queries from 60% to 50%.

**Key Result:** Get feedback from 25 customers on how to improve our customer service.

**Key Result:** Develop a comprehensive customer service playbook (KR Milestones)

**Key Result:** Celebrate and reward team members who help customers best each month. (KR Milestones)

# How to make a stronger OKR

---

**Objective: Improve customer service**

**Key Result (Intent):** Provide Sales training

**Key Result (Intent):** Improve phone system

**Key Result (Intent):** Improve call scrip

**Objective: Improve customer experience to reduce the time they take to solve their problems.**

**Key Result:** Ensure each Sale Team has had a least 2 coaching sessions to review recent problematic calls by Team 1.

**Key Result:** Upgrade the phone system to version 4.5 and hold 2 webinars with staff to review the new functions.

**Key Result:** Research and identify the top 10 service complaints and develop one-page call scripts to diagnose each issue. (KR Milestones)

# Quality & Quantity OKR (Key Result)

## Quantity

Create 3 new features

## Quality

Create 3 new features with fewer 5 bugs per feature

## Results

Developers will write cleaner codes...

## Weak to strong OKR

### Weak

**Objective:** Win a Formula 1 Race

- KR 1:** Increase lap speed
- KR 2:** Reduce pit stop time

### Average

**Objective:** Win a Formula 1 Race

- KR 1:** Increase average lap speed by 2%
- KR 2:** Reduce average pit stop by 1 sec

### Strong

**Objective:** Win a Formula 1 Race

- KR 1:** Increase average lap speed by 2%
- KR 2:** Reduce intermediate pit stop by 1 sec
- KR 3:** Reduce pit stop errors by 50%
- KR 4:** Practise pit stop 1 h per day
- KR 5:** Test 10X at wind tunnel

# Sum up for Strong OKRs

---

1. **Outcome-Driven** Objective and Key Results
2. **Lagging** and **Leading** Indicators
3. **No Gaps** (too ambitious) and **Overlaps** (dependencies)

# Fitness Studio – Build up your OKR Muscle

# OKR

## Exercise – Round 1

---

**Objective:** Establish a Best Practice Idea Process

**Key Result 1:** Generate 50 new ideas

**Key Result 2:** Prioritizing 5 new ideas according to criteria

**Key Result 3:** Conduct client tests on the prioritized ideas

Purpose

Impact

Task

Outcome

- Why does this OKR not work?
- Which method wasn't taken into account?
- What should be improved?

# OKR

## Exercise – Round 2

---

**Objective:** Increase company visibility for potential new clients

Purpose

**Key Result 1:** Increase weekly blog posts from 2 to 5

Leading

**Key Result 2:** Conduct 2 daily client interviews

Leading

**Key Result 3:** Increase newsletter signups by 250%

Gap

# OKR

## Exercise – Round 3

---

**Objective:** Reduce CO2 company footprint

**Key Result 1:** 2 x monthly meetings with the material provider to achieve 100% target

**Key Result 2:** Include a Milestone Key Result 1-100%

**Key Result 3:** E-bikes for every employee

# OKR

## Exercise – Round 4

---

**Objective:** Increase awareness that we are a world market leader

**Key Result 1:** Include a Milestone Key Result 1-100%

**Key Result 2:** Increase NPS from 8 to 9.5

**Key Result 3:** Upload 2 client testimonials per week

**Key Result 4:** Include a Milestone Key Result 1-100% or own Objective

# 3 Types of OKRs

---

**Aspirational OKRs** – Big Picture Ideas - **working on the business**

**Operational OKRs** (Committed) – Company Metrics: Product Launch, No of Customers...Management typically sets these at the company level, while employees set goals at department levels - **working in the business.**

**Learning OKR** - Encourages teams to **test a hypothesis** or study a new approach by exploring an unproven theory or strategy. They help define success when the outcome is uncertain or undefined.

# Types of OKRs

## Exercise

---

**Aspirational Objective (OKR)?**

**Operational Objective (OKR)?**

**Learning Objective (OKR)?**
